INDEX, Vol. 58

α1-antitrypsin. 'SZ-like'...phenotypes in PI ZZ children with liver disease, 11
(AAT). Evaluation of a transgenic mouse model for alpha-1-antitrypsin...related liver disease, 305
Abbott, C. & Chambers, D.
analysis of CAG trinucleotide repeats from mouse cDNA sequences, 87
adenomatous polyposis. Age of onset in familial...: heterogeneity within families and among *APC* mutations, 331
adenomatous polyposis coli. Frequent normal allele loss and maternal origin of the mutation shown by DNA homoduplex analysis in a severely affected patient with, 101
adenosine deaminase. An Asp8Asn substitution results in the...(ADA) genetic polymorphism (ADA 2 allozyme): occurrence on different chromosomal backgrounds and apparent intragenic crossover, 1
Adolph, K. W. *ed.*
Gene and chromosome analysis, reviewed by B. Carritt, 301
age of onset in familial adenomatous polyposis: heterogeneity within families and among *APC* mutations, 331
Ali, R., Perfumo, S., della Rocca, C., Amicone, L., Pozzi, L., McCullagh, P., Millward-Sadler, H., Edwards, Y., Povey, S. & Tripodi, M.
evaluation of a transgenic mouse model for alpha-1-antitrypsin (AAT) related liver disease, 305
